---

## SUMMARY

Frontend Developer with 2+ years of experience building responsive and scalable web and mobile applications using React.js and React Native. Skilled in state management, real-time features, and deployment to production environments. Experienced in integrating APIs, AI chatbot solutions, and cloud-based hosting. Adept at optimizing performance and collaborating in agile development teams.

## TECHNICAL SKILLS

- **Frontend:** React.js, React Native, Next.js, TypeScript, Tailwind CSS, Ant Design, MUI
- **State Management:** Redux Toolkit, Redux Saga, React Query, Zustand, Context API
- **APIs & Real-time:** Socket.io, Pusher, Firebase Realtime DB, Supabase, REST APIs, WebSocket
- **Backend Familiarity:** Node.js, KeystoneJS, Laravel, Express.js (bug fixing, API integration)
- **Testing & Debugging:** Jest, React Native Testing Library, Chrome DevTools, Flipper
- **CI/CD & Deployment:** Google Play Store Deployment, Firebase Hosting, Vercel, Netlify, Expo EAS
- **Cloud Services:** Firebase Functions, AWS Amplify (basic), Supabase
- **Payment Gateway:** Stripe
- **Folder Structure:** MVC, Atomic Design
- **Tools & Dev:** GitHub, GitLab, Bitbucket, Jira, Trello, Zoho

## PROFESSIONAL EXPERIENCE

### Frontend Developer (React Native) — Adroid IT Solutions (Feb 2025 – Present)

- Developed and enhanced gym, marketing, chat, and work management apps with a focus on performance and scalability.
- Implemented AI chatbot solutions and LLM integrations while contributing to backend development in Node.js, KeystoneJS, and Laravel.
- Led real-time chat and notification features, optimized state management, and collaborated on robust app architecture.

### Frontend Developer (React Native) — AppCrates (July 2024 – Feb 2025)

- Built and maintained mobile apps for gym, chat, and work management platforms.
- Integrated real-time communication features, optimized APIs, and improved front-end structure for scalability.
- Worked closely with cross-functional teams to deliver responsive and stable applications.

### React Developer — Al-Salam Tech House (Mar 2023 – Mar 2024)

- Developed CRM web applications and a ride-booking mobile app using React Native.
- Focused on performance optimization, UI/UX improvements, and efficient state management.
- Collaborated with teams to implement new features and ensure scalable solutions.

## EDUCATION

Bachelor of Science in Information Technology — University of Punjab (Sep 2018 - Aug 2022)

Major: Web Application.

Final Year Project: CRM web application using PHP Laravel, SQL, and Bootstrap.

## Additional Information

Languages: English, Urdu

Additional Skills: WordPress, Bubble.io, Microsoft Office Suite

Awards: Most Innovative Employer of the Year (2023)

## **PROJECTS**

### **Kroolo – Work Management Application**

- Slack & Trello-like app enabling team chat, task tracking, and collaboration.
- Built with React Native, TypeScript, Redux Saga, Socket.io, following MVC architecture.
- Implemented task creation, real-time messaging, and role-based collaboration features.

### **AI-CabApp – Cab Booking Application**

- Two apps: Driver and Rider with Google Maps integration for real-time navigation.
- Used Axios for API integration and implemented rider details, ride options, and ratings.
- Built an admin web panel in Next.js for efficient management.

### **ChirpByte – Customer Support Application**

- Customer support app integrating live chat with WhatsApp, Facebook, and Instagram.
- Used Redux Toolkit, Socket.io, and Pusher for real-time communication.
- Developed live visitor tracking and chat history for customer insights..

### **Fitster – Gym Booking Application**

- Gym booking app with search, filters, and booking functionalities.
- Integrated AWS authentication, OTP, and Axios for API communication.
- Implemented advanced filtering by price, rating, and location.

### **AI Salaam Tourism - Tourist and Events Booking Web Application**

- Web application for booking the latest events and tours in Dubai, with specific features for family and single travelers and safety measures for children.
- Utilized Next.js for server-side rendering, Axios for API integration, and Redux Toolkit for state management.
- Implemented a user-friendly admin panel for CRUD operations and styled the app with Tailwind CSS and Framer Motion for smooth animations.

### **Skip2Beat - Fitness Application**

- Fitness app allowing users to do show cardio exercise with the rep counts and playing music to boost up.
- Also provide nearby locations of end users using real time map of different designs and can send them friend request, can do chat and also can see each others rep points.
- Implemented socket.io, google map and api integration.
